A. E. WOHLERT.

The Garden
Nurseries

NARBERTH, PA.

Beautify Your City With **FLOWERING TREES**

THE parks, boulevards and public grounds of your city can be transformed into places of lasting beauty by planting graceful Flowering Trees of the Orient. Everyone knows of Potomac Park in Washington where the Cherry Blossom Season attracts thousands of visitors. In Fairmount Park, Philadelphia; Druid Hill Park, Baltimore; Oakman Boulevard in Detroit, and in St. Louis, Cherry plantings draw similar throngs to enjoy the acres of lovely bloom each spring.

The Philadelphia Zoological Garden is planting over one thousand of our Flowering Trees, which will add very materially to the attractiveness of the Garden and will draw many visitors each spring.

Flowering Trees are effective either in small groups or in large plantings. They require very little care and may be grown successfully without special preparation in almost any section of the country.

To public-spirited men, who wish to make an unusual, lasting and effective contribution to the beautifying of their home city, Flowering Trees are the ideal medium.

It has always been our custom to make very substantial inducements to quantity buyers, more particularly when the planting is intended for the benefit of the public at large, such as boulevard and street planting, hospital, college, school and park plantings. Therefore, the total cost will not be very great.

For your convenience we are listing in this booklet a fairly inclusive list of parks and other public and semi-public grounds for which we have supplied Flowering Trees.

Our book, "Flowering Trees of the Orient," supplies valuable information about Flowering Cherries, Crabs, Peaches, Plums, Magnolias and Dogwood, as well as other specialties.

Japanese Rose-flowering Cherry: Naden Zakura, as grown in Narberth, Pa.

Japanese Cherries "Beni Higan" in bloom at the Forest Hills Gate, Arnold Arboretum, Boston. Note that all trees on the hill are yet bare and in winter form.

PRICE LIST FOR 1934 AND 1935

Japanese Roseflowering Cherries

NOTE: Capital letters following each description indicate sizes; see price lists following each group of descriptions.

AVIUM FLORA PLENA, double pure white. A very fast and symmetrical growing tree, covered with double white flowers; a real shade tree, too. Known for seventy-five years as a splendid ornamental tree. D to J.

BENI HIGAN-ZAKURA (Higan Cherry, *P. Subhirtella*), "Spring Cherry." First to bloom; very prolific; blush pink; small single flowers that bloom with the last snow of winter. B to K.

"This is the Japanese Spring Cherry which the late Mr. Wilson, after a year devoted in Japan to the study of Cherry-trees, calls 'the most floriferous and perhaps the most delightful of all Japanese Cherries.' It is a large, low-branched shrub rather than a tree and is not known as a wild plant. This Cherry is much planted in western Japan from northern Hondo southward, but it is not much grown in the eastern part of the Empire and is rarely found in Tokyo gardens. For this reason and as it does not reproduce itself from seed *Prunus subhirtella* is still rare in American and European collections. There are large plants in the Arboretum collection, where they have been growing since 1894, and where, covered with their drooping pink flowers, they are objects of wonderful beauty. The value of *Prunus subhirtella* is increased by the fact that the flowers often remain in good condition for ten or twelve days, and longer than those of the other single-flowered Cherry-trees. This Cherry can be raised from soft wood cuttings and by grafting on its own seedlings. These will grow into tall trees with long, straight trunks. (*Prunus subhirtella*, var. *ascendens*) and in Japanese temple gardens are sometimes fifty feet high with trunks two feet in diameter. This is a common tree in the forests of central Japan, and grows also in southern Korea and central China. Until Wilson's investigations in Japan in 1914 this tree seems to have been entirely unknown in western gardens. Raised from the seeds of *Prunus subhirtella*, which are produced in large quantities every year, it grows here rapidly and proves to be a handsome tree. It has the drooping flowers of the well-known *Prunus pendula* of gardens, which is only a seedling form of *P. subhirtella ascendens* and for which the correct name is *Prunus subhirtella* variety *pendula*. This tree is not known to grow wild, but has for centuries decorated courtyards and temple grounds in central and northern Japan. The largest tree seen by Wilson was sixty-five feet tall with a head as broad as the height of the tree. There is a form of *P. subhirtella* (var. *autumnalis*) with semi-double flowers which blooms in both spring and autumn. This is a shrub often cultivated in Tokyo gardens, and in the Arboretum first flowered in May, 1915."

(Extract from Bulletin No. 3 of the Arnold Arboretum, Harvard University.)

FUJIZAN (Shirotae; Mount Fuji), snow white; large double flowers; vigorous; extra choice. A splendid showy variety; considered one of the better of the white double Japanese Cherries. B to K.

HOSOKAWA-BENI-ZAKURA, pink, mid-season; upright growth, slight spread; fragrant double flowers; one of the best; another of the hyacinth flowering sorts. A to K.

KANZAN ZAKURA, double deep pink; vigorous; upright and no great tendency to spread while growing. A good street tree. This sort seems to be especially appreciated in Washington, D. C. Rated as a prime variety. Old trees are likely to have a top shaped like an open umbrella. B to K.

KOFUGEN-ZAKURA (Fugenzo), double deep pink; vigorous; upright and no great tendency to spread. One of the best. A good street tree. The best deep pink sort. If planted in quantities this sort should have a lighter variety, such as *Naden* or *Rosea*, as a foil. A to K.

NADEN-ZAKURA, pink; late flowering; double; very popular; vigorous grower; showy and attractive; adapted for street or lane planting. This variety is an excellent companion for *Kofugen*. A to K.

ROSEA (Rose), late; double flowers about $1\frac{3}{4}$ inches in diameter, borne in raceme-like clusters of three or four flowers; vigorous; a spreading sort; a good lane, shade or street tree. A free bloomer and the flowers open fully just as the leaves commence to develop. B to K.

YOSHINO, single blush; red buds; early. Also called "Yedoensis." This is the tree that borders the Tidal Basin in Washington, D. C. A snow white form exists. Our Weeping Yoshino (Shirdareyoshino) is snow white. C to K.

YOSHINO DAYBREAK, delicate flesh pink. Single flowers so dense as to almost obscure the branches. Flowers are a deeper color and larger than Yoshino. C to H.

Prices of above 10 varieties

Size			Each	Ten	Size			Each	Ten
A	1½ to 2 ft.		\$1.00	\$7.50	E	5 to 6 ft.		4.00	30.00

D	4 to 5 ft.		2.50	20.00	H	8 to 10 ft.		10.00	75.00
Extra Heavy Selected specimens					I	8 to 10 ft.		15.00	100.00
Selected specimens					J	10 to 12 ft.		25.00	150.00
Extra Heavy specimens					K	12 to 14 ft.		35.00	250.00

Note: The letters after the description indicate the sizes available in that particular variety as shown by the prices.

AMANOGAWA-ZAKURA, light pink; late; fragrant; double; pyramidal or columnar; new variety; just right for formal planting or small gardens. A very unusual sort, attracts favorable attention always—and yet very rare. Planted two feet apart in a straight line, Amanogawa makes a perfect hedge and need never be pruned or sheared.

Prices of Amanogawa

Size			Each	Ten	Size			Each	Ten
3 to 4 ft.			\$2.50	\$15.00	Selected	7 to 8 ft.		10.00	75.00
4 to 5 ft.			3.50	20.00		8 to 9 ft.		12.50	100.00
5 to 6 ft.			4.50	30.00		9 to 10 ft.		15.00	125.00

7 to 8 ft.			7.50	50.00		12 to 14 ft.		40.00	175.00

AUTUMNALIS, (October flowering), semi-double; pink flowers; blooms in Fall and early Spring; very unusual and rare. During the mild winter of 1930-31 Autumnalis was in bloom from November until May. On Christmas Day that year it was particularly notable for the very liberal display of flowers, almost as abundant as indicated by the picture on page 45 showing the Beni Higan in bloom at the Arnold Arboretum.

Price of Autumnalis

Size		Each	Size		Each
3 to 4 ft.		\$4.00	6 to 7 ft.		8.00
4 to 5 ft.		5.00	7 to 8 ft.		10.00
5 to 6 ft.		6.00			

ASAHI-BOTAN-ZAKURA, early or midseason; blush; double; one of the very slow growing sorts; dwarf habit; prolific bloomer; hyacinth arrangement of flowers. A to G.

BOTAN-ZAKURA, blush; double; slow-growing sort; prolific bloomer. D to F.

JEANNE WOHLERT, dwarf; semi-double; new; rare. The effect of this tree in bloom is that of many branched hyacinth of a lovely soft pink. A to D.

KURAMAYAMA, a beautiful double flowering variety opening out rather flat. Center flesh pink, marked carmine at the edges, petals ruffled or frilled; late flowering. F to H.

MIKURUMAGAESHI-ZAKURA, blush; midseason; double flowers; spreading growth; one of the loveliest; a typical hyacinth flowering variety; fragrant. A to I.

MIYAKO, flowers double and large, nearly 2 inches in diameter, almost white, faintly flushed. Center of flower usually has several carpels that are green or white veined green, giving it an unique appearance. F to H.

MOMIJIGARI, a subhirtella variety, so has small flowers which are red in the bud but open deep pink. Semi-double. D to H.

OKUMIYAKO-ZAKURA, semi-double; pink; late flowering; NEW; a very choice sort. The delicate coloring of this variety makes it stand out in any collection as something very desirable. B to I.

PAUL WOHLERT, semi-double; deep pink or red; fragrant; flowers in great profusion. The earliest of the large hyacinth flowering varieties. A to F.

KUNRIN JO SHIROTAE. Double white; fragrant. B to E.

RUTH WOHLERT, blush; midseason; spreading. An extra good sort with double flowers of attractive tint. NEW. B to G.

SARGENTI (Yama; *Prunus serrulata sachaliensis*), single; large purple flowers; early; spring foliage purple, green in summer; a popular sort. Very hardy. C to G.

SHOGETSU, soft pink; double; large. Has leafy green carpels in center of flower; leaves very pale green. A beauty in every way. B to F.

SERRULATA ALBO ROSEA (Shirofugen), vigorous; light pink; large double flowers. Late flowering. C to F.

SHIRO-HIGAN, single pink; large flowers. Early; vigorous. A choice sort. D, H, I, J.

TAIZANFUKUN, flowers of medium size, double and tufted. Light pink, becoming flesh or nearly white; leaves small; grows unusually erect and slender; late. B, G, H.

TAKINIOI, flowers of medium size, single and semi-double; buds flesh, open flowers white. Valued for its delightful fragrance. F to G.

UKON-ZAKURA, "The Golden Cherry," yellow; double; vigorous grower; spreading. Should be in every collection. B to I.

WASHINOWO-ZAKURA, large; white; profuse bloomer; fragrant; slow-growing. B to G.

Our selection of Japanese Flowering Cherries assorted:

100 trees	2 to 3 ft. high	\$75.00
100 trees	3 to 4 ft. high	100.00
100 trees	4 to 5 ft. high	150.00
100 trees	5 to 6 ft. high	200.00
100 trees	6 to 7 ft. high	300.00

Japanese Weeping Cherries

SHIDARE-HIGAN-ZAKURA (*Prunus Subhirtella Pendula*), Pyramid Form, single; pink; early, after Beni-Higan, the first tree to bloom in the Spring and the first deep pink flowers of the season. *Prunus Subhirtella Pendula* can also be had as top worked or standards as listed below, but to most people they are more attractive in the bush or pyramid form with weeping branches stretching out from the ground up. A very shapely and picturesque tree. Of the many varieties of *Prunus Subhirtella Pendula*, the variety Shidare-Higan is by far the best and the only worth-while sort. We have discarded all the rest.

Size	Each	Ten	Bushy	Size	Each	Ten
2 to 3 ft.	\$2.50	\$20.00		8 to 9 ft.	15.00	125.00
3 to 4 ft.	3.00	25.00		8 to 9 ft.	20.00	175.00

10% additional paid at time of purchase insures free replacement for one year.

Flowering Crabs

- MALUS ARNOLDIANA** (Arnold C.), semi-double; pink; early flowering; splendid foliage; yellow fruit; a popular sort. A to H.
- MALUS ATROSANGUINEA** (Carmine C.), single; red; bush form; early flowering. This is my personal preference; it may be used in varied positions. Absolutely the most showy of the lot. Adapted for hedge planting or screens. Makes a perfect hedge 8 to 10 ft. high. A to H.
- MALUS BACCATA** (Siberian C.), single; white; fragrant; upright; tree-like growth; brightly colored fruit good for jelly besides being ornamental. A few larger trees. Price on application. A to E.
- MALUS BECHTELS** (Ioensis Plena), double; pink; fragrant; late flowering. The well-known popular sort. Standards or tree form. Comes into bloom when quite small and is exceedingly hardy. B to F.
- MALUS DR. VAN FLEET.** A new introduction of merit. Vigorous grower. Large pink single flowers. A to H.
- MALUS ELEYI**, purple to red foliage and bloom. NEW. Best red leaf sort. In sunlight the foliage is quite brilliant and stays so until fall, rivaling Japanese red-leaf maples. During flowering period the tree is smothered with large purple flowers in clusters. Absolutely the most showy variety while in fruit, which is of apricot color, cherry size. In both Pyramid and Standard Forms. A to H.
- MALUS FLORIBUNDA**, single; pink; early; spreading. Yellow fruit, slightly tinted red. An old, well-known sort and for that reason one of the best sellers. Should be used with all the dark sorts. A to F.
- MALUS FLORIBUNDA-PURPUREA**, one of the best, purple foliage and flowers, dark purple fruit, the second best of the purple leaf varieties. When the tree is in bloom, it is absolutely covered with deep purple blossoms more densely than any other variety I have observed with the exception of Hopa and Eleyi, which are equally good. Standard or tree form. A to H.
- MALUS HOPA**, large flowering, purple leaf crab. Very hardy and prolific bloomer, purple flowers. Very showy fruit; quite formal and shapely growth. A variety of great merit. Deep rose-colored flowers. B to H.
- MALUS IOENSIS** ("Prairie Crab"), large single, pink, fragrant, late flowering. Grows wild in many States, including Pennsylvania, but is well worth garden room, although too vigorous for a small garden. In both pyramid and standard forms. Heavy specimen plants only.
- MALUS MICROMALUS** (Midget C.), flowers pink tint; single; dwarf habit. An extra choice sort. NEW. Compact growth, vase form. The long, slender branches covered with flowers suggest garlands of flowers. Real quality, a prime sort. A to H.
- MALUS NIEDZWETZKYANA** (Redvein C.), purple leaf and bloom; large flowers and fruit good to eat. The first purple leaf sort known. A Japanese apple. In habit and growth it more closely resembles an ordinary apple than the Crabs, but it is not so big; generally symmetrical in growth. An old-time variety, not needed now, better sorts in my list, but folks will ask for them. E to H.
- MALUS PARKMANI** (Halliena Parkmani; Parkman C.), double; pink. A dwarf tree; very low growing; just right for small gardens; very hardy; flowers an exceptionally lovely pink. Prolific; one of the first to open and one of the last to fade. A to E.

10% additional paid at time of purchase insures free replacement for one year.

MALUS "RED TIP," NEW. Pink flowers; strong grower. A variety of great merit. A to E.

MALUS SCHEIDECKERI, double; pink; free flowering; fruit excellent for jelly. One of the most conspicuous pink flowering trees of early spring; very hardy. C to H.

MALUS SPECTABILIS ROSEA PLENA, very large double pink flowers, profusely produced. A rare sort; very choice. One of the better double-flowering varieties. A to G.

MALUS SPECTABILIS WHITE, a white form of the above.

MALUS THEIFERA, used for tea making in China; lovely pink bloom; glossy foliage; upright habit. (Not the tea plant, but a Chinese substitute.) A to H.

Prices of above 18 varieties:

	Size	Each	Ten
A	3 to 4 ft.	\$1.75	\$15.00
B	4 to 5 ft.	2.50	20.00
C	5 to 6 ft.	3.50	30.00
D	6 to 7 ft.	4.50	40.00
Specimens, Heavy	E 7 to 8 ft.	10.00	90.00
Specimens, Heavy	F 8 to 9 ft.	15.00	125.00
Specimens, Heavy	G 9 to 10 ft.	20.00	175.00
Specimens, Heavy	H 10 to 12 ft.	35.00	

MALUS TSCHONOSKI, very fine cut foliage; white flowers; beautiful compact tree.

MALUS ALDENHAMENSIS, rose-pink flowers. A new variety from England.

Price of above two varieties:

3 to 4 ft.	\$2.50
4 to 5 ft.	\$3.50

MALUS SARGENTI (Sargent C.), dwarf; white; abundant showy fruit. A sort for the small garden and a great favorite with me on account of the bright fruit, and with the birds equally popular. Low growing and spreading habit, almost creeping. Just the sort for rockeries and small gardens. One of the most striking varieties. Positively true to name. Good for a hedge up to 6 feet high.

Size	Each	Size	Each
18 to 24 in.	\$1.50	3 to 4 ft.	\$2.50
2 to 3 ft.	2.00	4 to 5 ft.	4.00

Specimens 7 to 8 ft. spread x 8 to 9 ft. height	25.00

WEeping APPLE ("Malus Eva Rathke"), forms a perfect tent and produces good, large edible apples. A very picturesque tree on account of its very irregular habit; quite Japanese. Pyramid Form. A to E.

	Size	Each	Size	Each
Low Branched	3 to 4 ft.	\$4.50	5 to 6 ft.	\$6.50
	4 to 5 ft.	5.00	6 to 8 ft.	8.00

WEeping CRAB ("Malus Floribunda Excellenca Thiel"), pink, single flowers produced in early spring.

	Each	Ten		Each	Ten
Standards 3 yr. head	\$4.50	\$40.00	Standards 4 yr. head	\$5.50	\$50.00

10% additional paid at time of purchase insures free replacement for one year.

ORIENTAL WISTARIAS

Without any doubt Wistaria is the finest flowering vine in cultivation for the temperate climate. It is adaptable to all conditions, for pergolas, to cover dead or live trees, to cover unsightly buildings, to beautify lovely buildings, as formal tree-like plants for formal gardens, in bush form on the lawn, and many other purposes.

Wistaria may be raised from seed and under certain favorable conditions may produce flowers within five years. Many nurseries sell seedling Wistaria, they can be produced cheaply, but the unfortunate result for the unlucky buyer is, they may not flower in his life time.

For good and reasonably prompt results, it is absolutely necessary that Wistaria must be produced, grafted, from flowering wood, at least from flowering vines. This process of grafting has a distinct tendency to slow up the growth and produce flowers within two or three years after transplanting from our nurseries. Under certain favorable conditions, especially with larger vines, one can be assured of flowers at once. Under no circumstances should gardeners plant seedling Wistaria.

Our Wistaria are all grafted from scions taken from blooming vines or from flowering wood. Our stock should bloom very soon after planting. Grafted plants cannot be sold as cheaply as seedlings. Seedlings may not bloom for ten years.

Chinese Wistaria

CHINESE WISTARIA (*Wistaria Chinensis*) is an excellent sort and the most commonly known Wistaria, very fragrant, and is available in three distinct varieties.

WISTARIA CHINENSIS — Purple. This is the most popular variety of all. Quite common, but good. Grafted plants. Seven-year-old plants are grafted, trained specimen, heavy, twice transplanted.

WISTARIA CHINENSIS ALBA — White. This sort is more fragrant than the purple form. Grafted stock.

Price of above 2 varieties

	Each	Two
2 years	\$1.50	\$2.50
3 years	2.50	4.50
Purple, 5 years	5.00	9.00
Purple, 7 years	7.50	14.00

Wistaria Chinensis, grafted vines bloom.

WISTARIA CHINENSIS COERULEA — Blue. A new introduction popular in the Southwest, where it is rated as an improvement over the familiar, old-fashioned, purple Chinese Wistaria.

2 years	\$2.00 ea.
3 years	\$3.00 ea.

NOTE: We will pay the postage on one, two and three year old Wistaria vines, but the larger vines as well as the Standard Wistaria will be shipped Express Collect.

The Utility and Beauty of a Wistaria Arbor as Demonstrated by the Outside View of One of Them.
Chinese Wistaria Were Used.

Japanese Wistaria

JAPANESE LONGCLUSTER OR WEEPING WISTARIA is the most picturesque of all Wistaria and will certainly take the place of the common sort as soon as enough plants are available, at least for use as a pergola vine; a glance at the illustration on the opposite page will prove that. The flower clusters are very much elongated, the flowers being somewhat thinly distributed along the central cord, or stem, producing an unrivaled, graceful effect. Be sure to order one or two vines at once, the supply is limited. If we have sold out when your order arrives, your order may be booked either for next fall or spring planting season.

WISTARIA FLORIBUNDA VIOLACEA PLENA. This variety is of great decorative value, largely on account of its impressive substantial looking flowers. The flowers are not unlike double Russian violet, a deep violet blue, and it is rated as being the deepest colored of all the double Wistaria. It is a distinct novelty of great value. Clusters of medium length.

	Each	Two		Each	Two
1 year	\$1.50	\$3.00	3 years	5.50	10.00
2 years	3.00	5.00	4 years	7.50	12.50

WISTARIA FLORIBUNDA
(*Wistaria multijuga*) purple.
Flower clusters of medium length on young plants. The old plant from which our stock was produced frequently had racemes 30 inches long.

	Each	Two
1 year	\$1.00	\$1.50
2 years	2.50	4.00
3 years	3.50	6.00
4 years	5.00	8.00

The following sizes of Wistaria Floribunda are specimens. The stocky plants are tree-like, as they were grown without support. In this lot there is a variation in the length of the racemes and also in the intensity of coloration. All purple shades or blue. They all have flowered for several years and are correctly labelled as to color. The plants are almost as wide as they are high.

5 ft. high	\$10.00 each
6 ft. high	20.00 each
7 ft. high	25.00 each
8 ft. high	30.00 each

WISTARIA FLORIBUNDA

ALBA (White Fringe Wistaria). Flower clusters 18 to 24 inches long, occasionally longer. Flowers are white and fragrant. A very desirable variety and very serviceable where it is difficult to use purple or lavender sorts.

	Each	Two
3 years	\$3.50	\$6.00

Wistaria Floribunda Violacea Plena

	Each	Two
4 years	\$5.00	\$9.00

Wistaria Floribunda Naga Noda; flowers 4 feet long.

WISTARIA FLORIBUNDA ROSEA (Rose Weeping Wistaria). An interesting variation; a favored color in Japan is this superior variety of Pink Weeping Wistaria. All vines are produced from selected stock plants. Flower clusters of medium length on young plants; 24 inches or more on established vines. This Wistaria with its lovely clear pink clusters is a real sensation. To meet the growing demand for pink flowers, we have introduced this desirable novelty.

	Each	Two		Each	Two
1 year	\$1.50	\$3.00	3 years	5.00	9.00
2 years	3.00	5.00	4 years	7.50	14.00

WISTARIA VENUSTA ALBA (Silky Wistaria). A lovely, silk lace effect when a well-established plant is in full bloom. The plants are stocky, stiff tree-like and have bloomed at least once. Flowers 18 to 24 inches long.

	Each	Two
3 years	\$4.00	\$7.50

WISTARIA FLORIBUNDA NAGA NODA. Extra long Japanese Wistaria. A variety of *W. multijuga* with astonishingly long clusters of purple flowers. On a well-established vine they will run three to four feet in length. The original old vine frequently has clusters four to five feet long. Three vines of this variety are known to exist in the Philadelphia district where they attract a great many visitors, all marveling at the freakish length of flowers. For some reason this variety has escaped cultivation, but is again being produced by us. **NAGA NODA** is being offered by other nurseries at much higher prices, 2 to 3 year old vines as high as \$15.00 each, and the existing demand has permitted these high prices, but our large stock has enabled us to cut that price in half.

	Each	Two
1 year	\$2.00	\$4.00
2 years	5.00	9.00
3 years	7.50	12.50

Standard Wistaria

STANDARD WISTARIA OR WISTARIA IN TREE FORM.

Wistaria grown in this manner have many advantages. The flowers are displayed to greater advantage; the trees can be used by gateways, as accent in formal gardens and as individual trees in border plantings. When one is anxious to get results quickly the Standard Wistaria may also be used as a vine. Simply plant this little tree where you want the vine developed. By so doing, you will get quicker results and flowers sooner than you would if you used our 3 and 4 year old vines, as most of the Standards are at least 6 years old. They generally produce the second season, if not the first, after you plant them. The Wistaria in tree form have stems at least 4 feet high, and the top is likely to be from 2 to 3 feet high. For that reason they cannot be sent by Parcel Post, but are shipped by express or freight at your expense.

STANDARD OR TREE-FORM WISTARIA (4 foot stems) can be had in the following varieties:

Chinese Purple	\$7.50 each
Floribunda Naga Noda	12.50 each
Floribunda Rosea	9.00 each
Floribunda Rosea, heavy	15.00 each
Floribunda Violacea Plena	9.00 each
Floribunda Violacea Plena, heavy	15.00 each

We have a few specimens of larger sizes in Tree Form. Prices on application.

Wistaria Floribunda Rosea, a pot-grown vine 6 years old.

Ornamental Flowering Trees

		Size	Each	Ten
CERCIS , Redbud or Judas Tree.				
Canadensis, American Redbud. Profuse rich purple flowers in early spring.		4 to 5 ft.	\$1.50	\$12.50
		5 to 6 ft.	2.00	15.00
		6 to 7 ft.	3.00	
		7 to 8 ft.	4.00	
Chinensis, Chinese Redbud. Dwarf growing shrub; deep pink flowers in profusion in early spring absolutely hiding the bare branches; the soft green foliage comes later; a very unusual shrub.		18 to 24 in.	2.00	15.00
		2 to 3 ft.	2.50	20.00
		3 to 4 ft.	3.50	32.50
CORNUS , Dogwood.		3 to 4 ft.	1.50	
Florida, White Flowering Dogwood. Well branched and bushy.		4 to 5 ft.	2.50	
		5 to 6 ft.	3.50	
		6 to 7 ft.	6.00	
		7 to 8 ft.	7.50	
		8 to 9 ft.	15.00	
Florida Rubra, Pink Flowering Dogwood.		2 to 3 ft.	2.50	20.00
		3 to 4 ft.	3.00	25.00
		4 to 5 ft.	4.00	35.00
		5 to 6 ft.	5.00	45.00
		6 to 7 ft.	7.50	65.00
		7 to 8 ft.	10.00	90.00
		8 to 9 ft.	20.00	150.00
Florida Plena, Double White Flowering Dogwood. Creamy white gardenia-like flowers.		5 to 6 ft.	5.00	
		6 to 7 ft.	7.50	
		7 to 8 ft.	10.00	
Kousa, Japanese Dogwood. Large white flowers; later than our American sorts.		4 to 5 ft.	3.50	
		5 to 6 ft.	4.00	
		6 to 7 ft.	5.00	
		7 to 8 ft.	6.00	
CRATAEGUS , Hawthorn.		2 to 3 ft.	2.00	15.00
Oxyacantha Splendens, Paul's Scarlet Hawthorn. Double scarlet flowers.		3 to 4 ft.	2.50	20.00
		4 to 5 ft.	3.00	25.00
		5 to 6 ft.	4.00	35.00
		6 to 7 ft.	5.00	45.00
		7 to 8 ft.	6.00	50.00
		8 to 9 ft.	7.50	65.00
		9 to 10 ft.	10.00	85.00
Oxyacantha Rosea Flora Plena. Double Pink English Hawthorn.		4 to 5 ft.	4.00	35.00
		5 to 6 ft.	5.00	45.00
		6 to 7 ft.	6.00	
		7 to 8 ft.	7.00	
		8 to 9 ft.	8.00	
		9 to 10 ft.	10.00	
Maseki. A rare new importation. Double rose pink flowers.		2 to 3 ft.	3.50	
		3 to 4 ft.	4.50	
		4 to 5 ft.	6.00	
	Heavy	7 to 8 ft.	7.50	
	Heavy	8 to 9 ft.	10.00	
		Heavy	9 to 10 ft.	15.00

LABURNUM (Goldenchain), Golden Wistaria.	3 to 4 ft.	1.00	9.00
Cytissus Laburnum. Very bushy, branched from the ground. Pure yellow flowers; practically a yellow Wistaria.	4 to 5 ft.	1.50	12.50
	5 to 6 ft.	2.00	15.00
	6 to 7 ft.	3.50	30.00
	7 to 8 ft.	4.00	35.00
	Heavy 8 to 9 ft.	10.00	75.00
	Heavy 9 to 10 ft.	12.50	90.00

MAGNOLIA

Alba Superba. A splendid white variety of vigorous growth. Occasionally the white petal is suffused with pink. A very delicate color scheme preferred by many.

Lennei. Lennei is the largest flowering of the Chinese Magnolias; large purple flowers freely produced; large foliage. The habit of growth of this variety is spreading; the lower branches show a distinct tendency to trail on the ground, but the tree can be headed up so the low branches may be removed from the ground. Under good conditions in fertile soil with abundant rainfall this sort will continue to bloom throughout the entire season. To a limited degree this can also be said of all the rest of the varieties. If a liberal amount of moisture and fertility is supplied to Magnolias, one can force them into bloom throughout the summer with no detriment at all to next spring's crop of flowers.

Soulangeana. Pink. Best known of all the Magnolias. Grows into a tree of medium size. All the sizes we offer are blooming size.

Price of above 3 varieties:

Size	Each	Ten	Size	Each	Ten
2 to 2½ ft.	\$4.00	\$35.00	5 to 6 ft.	\$12.50	\$100.00
2½ to 3 ft.	5.00	45.00	6 to 7 ft.	15.00	125.00
3 to 4 ft.	7.50	65.00	8 ft.	20.00	175.00
4 to 5 ft.	10.00	90.00	8 to 10 ft.	40.00	

Alexandrina. This variety appears to grow slower than Soulangeana and blooms a week later a deeper and better pink; flowers are formed similarly to Soulangeana, but are a decided improvement.

Yulan. Pure white.

Price of Alexandrina and Yulan: 25% higher than the above group.

Stellata (Halleana) is the familiar early blooming dwarf Magnolia, star-shaped, snow-white flowers, very fragrant; slow growth, and for that reason rather expensive. The stock of this variety is exceedingly limited in all American nurseries.

Prices of Stellata:

Size	Each	Size	Each
2 to 2½ ft.	\$5.00	3 to 4 ft.	\$10.00
2½ to 3 ft.	7.50		

Liliflora, covered with rosy-purple lily-like flowers early in the spring; of moderate growth, branching freely from the ground; destined to be one of the most popular varieties of Magnolias for small gardens. It will probably always remain a flowering bush more than a tree.

Price of Liliflora:

Size	Each	Size	Each
18 to 24 in.	\$2.00	3 to 4 ft.	\$4.00
2 to 3 ft.	3.00		

MAGNOLIA—Continued

Nigra (Purpurea), dark purple. One of the finest Magnolias in cultivation; moderate growth takes up less space than most varieties and is in my estimation one of the best sorts. The color of the flower is deeper and richer than all rest. Our nurseries is probably the only place where this variety can be bought. It is destined to be the most popular of all the Magnolias, and is particularly adapted to small gardens.

Price of Nigra:

Size	Each	Size	Each
18 to 24 in.	\$2.50	3 to 4 ft.	\$4.50
2 to 3 ft.	3.50	5 to 6 ft.	10.00
	6 to 7 ft.		\$15.00

Grandiflora, Evergreen Magnolia. Hardy in Eastern Pennsylvania and southwards.

Price of Grandiflora:

Size	Each	Ten	Size	Each	Ten
2 to 3 ft.	\$3.50	\$30.00	4 to 5 ft.	\$7.50	\$60.00
3 to 4 ft.	5.00	40.00			

Grandiflora Exoniensis. A dwarf form of the above. It is a continuous bloomer producing flowers throughout the entire summer season. A very satisfactory variety, extremely rare; particularly recommended to our customers in the South, but it is considered hardy from Philadelphia southwards.

Grafted plants, \$2.00.

PERSICA, Double Flowering Peach, in Pink, Red or White.

Size	Each	Ten	Size	Each	Ten
3 to 4 ft.	\$2.00	\$15.00	5 to 6 ft.	\$4.50	\$25.00
4 to 5 ft.	3.00	20.00			

PRUNUS

Amygdalus, Flowering Almond. Pink or White.

Size	Each	Ten
2 to 3 ft.	\$1.50	\$10.00
3 to 4 ft.	2.00	15.00
4 to 5 ft.	3.00	25.00

Cistena (P. Pumila), a purple-leaf Sandcherry. A beautiful, hardy, purplish-red-leaf flowering shrub of unique beauty. It keeps its color throughout the growing season.

4 to 5 ft.	2.50	20.00
5 to 6 ft.	3.00	25.00
6 to 8 ft.	5.00	40.00

Mume, Flowering Apricot. Dawn, large and beautiful double pink flowers.

4 to 5 ft.	3.50	30.00
5 to 6 ft.	4.00	35.00
7 to 8 ft.	10.00	

Very heavy

Newport, another purple-leaf Sandcherry, both as showy as Japan Maple.

5 to 6 ft.	3.00	25.00
6 to 7 ft.	5.00	

Othello, Purple-leaf Plum. A free-flowering variety, very desirable.

4 to 5 ft.	2.50	20.00
5 to 6 ft.	3.00	25.00

Pissardi, Purple-leaf Plum.

6 to 7 ft.	3.50	
7 to 8 ft.	4.00	
8 to 9 ft.	7.50	

Tomentosa (Nanking Cherry). The fruit is clear red, translucent, the sunlight shining right through the fruit, lighting it up gloriously. For further description see page 27.

2 to 3 ft.	1.00	8.00
3 to 4 ft.	1.50	10.00
4 to 5 ft.	4.00	30.00

Triloba, Flowering Plum. Very desirable low shrub with a mass of clear pink flowers. Can be had in either bush or standard form.

3 to 4 ft.	2.00	15.00
4 to 5 ft.	3.00	25.00

SORBUS, Mountain Ash.	8 to 9 ft.	3.00	25.00
Aucuparia, European Mountain Ash. A pretty	9 to 10 ft.	4.00	35.00
round headed small tree, 20 to 30 feet in height	10 to 12 ft.	4.50	40.00
at maturity, open in growth with spreading	12 to 14 ft.	5.00	45.00
branches. Its rough light-green foliage is in it-	14 to 16 ft.	7.50	60.00
self attractive, but its large clusters of red ber-	16 to 18 ft.	10.00	85.00
ries are very showy, and an excellent addition	18 to 22 ft.	15.00	125.00
for rounding off the season with a brilliant dis-			
play of color. Desirable for specimen plant-			
ing; for lining driveways, or for border planta-			
tions, where its bright berries will enliven the			
winter landscape. Much relished by the winter			
birds.			

Kofugen and Naden Zakura—as street trees

Azaleas

	Size	Each	Ten
Azalea Amoena. Very bushy, spreading shrub, effective when used in group planting as well as for hedging. Flowers are magenta or bright rosy purple produced in profusion in the spring; foliage becomes cheerful bronze in winter, turning green as spring approaches.	20 to 24 in.	\$5.00	\$40.00
	24 to 30 in.	7.50	60.00
	30 to 36 in.	10.00	85.00
	36 to 42 in.	15.00	110.00
	42 to 48 in.	20.00	150.00
	48 to 54 in.	25.00	200.00
Azalea Hinodegiri. Hardy; evergreen. On account of its brilliancy and general beauty, it is one of the most popular. The bush is a mass of clear, brilliant carmine pink flowers in the spring, and when planted among evergreens gives the very touch of color needed. Because of its individual beauty, it is desirable as a specimen plant.	8 to 10 in.	2.00	15.00
	10 to 12 in.	2.50	20.00
	12 to 15 in.	3.50	30.00
	15 to 18 in.	4.00	35.00
	18 to 20 in.	6.00	50.00
	20 to 24 in.	7.50	
	24 to 30 in.	10.00	
	30 to 36 in.	20.00	
Azalea Indica Alba, Azalea Ledifolia. Low growing; dense; white flowers produced in profusion in the spring. Blooms later than most varieties of Azaleas. Leaves are large light green. Evergreen.	20 to 24 in.	5.00	45.00
	24 to 30 in.	10.00	90.00
	30 to 36 in.	15.00	125.00
	36 to 42 in.	20.00	175.00
	42 to 48 in.	25.00	
Azalea Kaempferi. Salmon Pink, a lovely color; one of the hardiest sorts. A great improvement on the old reddish-orange, which we have entirely discarded. This sort could not well be called a Torch Azalea, it is entirely too lovely for that. Deciduous.	10 to 12 in.	3.00	
	12 to 15 in.	3.50	
	15 to 18 in.	4.00	
	18 to 24 in.	5.00	
A. Kaempferi Hybrids in a good range of colors; very hardy. Several years' tests in this country and in England have demonstrated that these new hybrids are just as hardy as the Kaempferi.	12 to 15 in.	3.00	27.50
	15 to 18 in.	4.00	35.00
	18 to 24 in.	5.00	45.00
Azalea Mollis, Chinese Azalea. Comes in various shades of yellow, terra-cotta, apricot and golden salmon flowers. Hardy. Cannot supply separate colors.	8 to 10 in.	1.50	
	10 to 12 in.	2.00	
	12 to 15 in.	2.50	
	15 to 18 in.	3.50	
	18 to 24 in.	5.00	
	24 to 30 in.	7.50	
Azalea Schlippenbachii, Royal Azalea. Flowers are lovely soft pink. A deciduous variety with large, showy flowers, the upper petals of which are spotted lightly with brown. A rare Korean variety of great merit. On account of our large stock of this sort we have reduced the prices very materially.	10 to 12 in.	2.50	20.00
	12 to 15 in.	3.00	25.00
	15 to 18 in.	4.00	35.00
	18 to 24 in.	5.00	45.00
Yodogawa. A semi-evergreen, conspicuous Japanese Azalea, purplish pink, brilliant, double flowers in early spring; fragrant; floriferous.	24 to 30 in.	5.00	
	30 to 36 in.	6.00	
	36 to 42 in.	7.50	
	42 to 48 in.	10.00	

Evergreens

BUXUS SUFFRUTICOSA (Dwarf Box). True Dwarf English Box. The best plant known for low hedges in the formal garden. The three largest sizes are fifteen years old.	Size	Ten	100
	4 to 5 in.	\$3.00	\$21.00
	5 to 6 in.	3.50	25.00
	6 to 8 in.	4.50	35.00
	8 to 10 in.	7.50	60.00
	10 to 12 in.	12.00	100.00
	12 to 14 in.	25.00	200.00
	14 to 16 in.	35.00	300.00
	16 to 18 in.	40.00	350.00
	18 to 20 in.	55.00	500.00
CEDRUS DEODARA (Deodar Cedar). A hardy type of Atlas Cedar. 12 to 16 feet high. \$40.00, \$50.00 and \$60.00 each			
CRYPTOMERIA (Japonica Lobbi, Japan Temple Tree). Tall and stately. Rich dark green foliage which becomes exceptionally attractive in the spring when the new growth is made. As a specimen tree it is unsurpassed. Very rare and much in demand. Sizes ranging up to 10 feet are probably quite plentiful throughout the Eastern States, but large trees are exceedingly rare, particularly choice, well-shaped specimens. All of ours, small or large, are specimen trees. With very few exceptions they are branched to the ground and are symmetrical, as they have been pruned annually and transplanted frequently. This method produces excellent compact trees.	Size	Each	Ten
	4½ to 5 ft.	\$6.00	\$50.00
	5 to 6 ft.	7.50	60.00
	6 to 7 ft.	10.00	80.00
	7 to 8 ft.	15.00	100.00
	8 to 9 ft.	22.50	175.00
	9 to 10 ft.	30.00	225.00
	10 to 11 ft.	35.00	300.00
	11 to 12 ft.	45.00	400.00
	12 to 13 ft.	62.50	500.00
	13 to 14 ft.	75.00	600.00
	14 to 15 ft.	100.00	900.00
	15 to 16 ft.	112.50	1,000.00
	16 to 17 ft.	137.50	1,250.00
	17 to 18 ft.	162.50	1,500.00
ILEX (Holly)			
Aquifolium (English Holly). Very superior to American holly, better foliage, brighter berries and more of them.	2 to 2½ ft.	\$7.50	\$65.00
	2½ to 3 ft.	8.50	75.00
	3 to 4 ft.	10.00	85.00
	4 to 5 ft.	12.00	100.00
	5 to 6 ft.	15.00	125.00
	7 to 8 ft.	\$17.50 to \$25.00 each	
Crenata (Japanese Holly). Dark green glossy leaves; inky black berries.	1½ to 2 ft.	\$3.00	\$25.00
	2 to 2½ ft.	3.50	30.00
	2½ to 3 ft.	5.00	40.00
	3 to 4 ft.	6.00	50.00
	4 to 5 ft.	7.50	65.00
	5 to 6 ft.	12.50	100.00
	6 to 7 ft.	15.00	125.00
JUNIPERUS CHINENSIS (Chinese Juniper).	2 to 3 ft.	3.00	25.00
	3 to 4 ft.	4.00	35.00
JUNIPERUS CHINENSIS COLUMNARIS (Columnar Juniper).	4 to 5 ft.	5.00	45.00
	5 to 6 ft.	6.00	50.00
JUNIPERUS BURKI, CANNARTI, FORTUNI,	6 to 7 ft.	7.50	60.00
KETELEERI, SMITHI and VIRGINIANA	7 to 8 ft.	10.00	90.00
	8 to 9 ft.	12.50	100.00
GLAUCA.	9 to 10 ft.	15.00	125.00
	10 to 12 ft.	20.00	175.00
	12 to 14 ft.	25.00	200.00
JUNIPERUS OBLONGA and SABINA.	18 to 24 in.	2.50	20.00
	24 to 30 in.	3.50	30.00

PICEA (Spruce)		Size	Each	Ten		
Pungens Kosteri (Koster's Blue Spruce). Possibly the best known of all the Blue Spruces.		2 to 2½ ft.	5.00	45.00		
		2½ to 3 ft.	6.00	55.00		
		3 to 3½ ft.	7.50	65.00		
		3½ to 4 ft.	10.00	90.00		
Pungens Hoopsi . The finest and most silvery of the Blue Spruces. By far superior to all the other varieties.		18 to 24 in.	5.00	45.00		
		24 to 30 in.	7.50	65.00		
Pinus Montana (Dwarf Mountain Pine). A slower growing type of the Mountain Pine; somewhat more vigorous than Mugho.		18 to 24 in.	2.00	15.00		
		2 to 2½ ft.	3.00	25.00		
		2½ to 3 ft.	4.00	35.00		
		3 to 3½ ft.	5.00	40.00		
		3½ to 4 ft.	7.50	60.00		
Pinus Montana Mughus (Mugho Pine). A choice strain of the Dwarf Mountain Pine. A select, compact type.		12 to 15 in.	2.00	15.00		
		15 to 18 in.	3.00	25.00		
		18 to 24 in.	4.00	35.00		
		24 to 30 in.	5.00	40.00		
		30 to 36 in.	7.50	60.00		
Pinus Strobus (White Pine).		6 to 8 ft.	10.00	75.00		
		8 to 10 ft.	12.50	100.00		
		10 to 12 ft.	15.00	125.00

	6 to 7 ft.	12.50	115.00
	7 to 8 ft.	15.00	135.00

Hilo, Hawaii.

Dear Sir:

Trees which you recently sent me have come to hand. Permit me to compliment you on the excellent manner in which these trees were packed. They reached me in perfect condition and I am very much pleased with them.

(The trees shipped were Japanese Flowering Cherries, Chinese Flowering Crabs, Chinese Magnolias and Pyracanthus.)

Bronxville, N. Y.

January 20, 1930.

My dear Mr. Wohler:

I have noticed with regret that this Commission has not told you how well the Cherries have done which you furnished in 1928.

We did not lose one tree out of the entire shipment, and despite the very unfavorable season last Summer the trees give every promise of giving a riotous display of bloom this Spring. Already the section in which they are planted is becoming a mecca for garden lovers.

Yours very truly,

Westchester County Park System.

So. Orange, N. J.

Dear Sir:

It may interest you to know that every bit of the very fine stock ordered by me from your nursery last November and this last Spring has come triumphantly through the drought and is well established. I am sure it will be the source of much pleasure for many years to come.

10% additional paid at time of purchase insures free replacement for one year.

Deciduous Shrubs and Trees

ACER PALMATUM ATROPURPUREUM, Red-leaved Japanese Maple.	Size	Each	Ten
	3 to 3½ ft.	\$10.00	\$75.00
	3½ to 4 ft.	15.00	100.00
	4 to 5 ft.	20.00	150.00
BERBERIS, Barberry.			
Thunbergi Atrosanguinea., Red-leaved Japanese Barberry. The specimen plants are extra heavy, 6 to 7 years old.	Two year	.25	2.00
	Three year	.35	3.00
	Specimens 3 to 4 ft.	5.00	45.00
	Specimens 4 to 5 ft.	7.50	65.00
Verruculosa, Warty Barberry. Foliage holly-like, perfect and green during the summer and warm weather, turning a purplish brown and scarlet in the winter.	15 to 18 in.	2.00	
	18 to 24 in.	3.00	
CRAPEMYRTLE, Lagerstroemia. A Southern shrub. Hardy in vicinity of Philadelphia and southwards. Dark green foliage and large clumps of beautiful flowers borne throughout the summer. All very heavy and bushy, 4 years old.	18 to 24 in.	2.50	20.00
	2 to 3 ft.	3.50	30.00
	3 to 4 ft.	5.00	40.00
CYDONIA JAPONICA (Pyrus Japonica). Flowering Quince. Mixed: Pink, crimson, red, scarlet, etc. Not labeled according to color.	1½ to 2 ft.	.75	6.00
	2 to 2½ ft.	1.00	8.00
	2½ to 3 ft.	1.50	10.00
	3 to 3½ ft.	2.00	15.00
	3½ to 4 ft.	2.50	20.00
	4 to 4½ ft.	3.50	30.00
Coral Pink. A splendid pink variety imported from England.	3 to 4 ft.	5.00	40.00
	4 to 5 ft.	6.00	50.00
Cathayensis, erect growing, deep pink flowers.	3 to 4 ft.	4.00	35.00
	4 to 5 ft.	5.00	45.00
	5 to 6 ft.	6.00	55.00
	6 to 7 ft.	7.50	65.00
EXOCHORDA GRANDIFLORA, Pearl Bush. Tall growing, pure white flowers.	2 to 3 ft.	1.00	7.50
	3 to 4 ft.	1.50	10.00
FORSYTHIA, Golden Bell (NEW varieties). These new varieties are so far superior to all the older sorts, that you are justified in planting them and destroying your old stock.			
Ovata. Introduced from Korea in 1917. Distinct and handsome species, the earliest to bloom, about 25th to 30th of March; flowers bell-shaped, clear butter yellow. Very compact upright shrub, 5 to 6 feet high.	2 to 3 ft.	\$3.50	
Intermedia, var. Primulina. Flowers clear primrose-yellow. The best of the pale yellow Forsythias. This sort originated in the Arnold Arboretum about 1910. Height 8 to 9 feet. It comes into bloom three to four days later than Spectabilis, and lasts longer.	5 to 6 ft.	3.00	20.00
	6 to 7 ft.	4.00	30.00
	7 to 8 ft.	5.00	35.00

10% additional paid at time of purchase insures free replacement for one year.

FORSYTHIA—Continued

Intermedia, var. Spectabilis. The best and finest of all Forsythias; rich, pure yellow flowers, each 1½ inches across; is probably the most handsome of all the Golden Bells. It is extremely floriferous and stems 6 to 8 feet long are crowded throughout the whole length with large clusters of blossoms. If only one Forsythia can be grown it should be this.	Size	Each	Ten
	2 to 3 ft.	1.00	7.50
	3 to 4 ft.	1.50	10.00
	4 to 5 ft.	3.00	20.00

Intermedia, var. Vitellina. Flowers deep yellow, a little smaller than Spectabilis flowers. Bush rather stiff, upright, strong greenish branches, deep green and large leaves. Height 7 to 8 feet. It does not flower as profusely as Spectabilis or Primulina, and comes into bloom about 5 days later than Spectabilis.	2 to 3 ft.	2.75	25.00
	3 to 4 ft.	3.50	30.00

KOLKWTZIA AMABILIS, Beauty Bush. A small shrub with slim drooping branches, pink flowers in profusion.	2 to 2½ ft.	1.00	7.50
	2½ to 3 ft.	1.50	10.00
	4 to 4½ ft.	3.50	30.00

LARIX EUROPAEA (European Larch). Yellow-green needles; in fall the soft textured pyramid turns to gold.	8 to 10 ft.	\$4.00	\$30.00
	10 to 12 ft.	5.00	35.00
	12 to 14 ft.	7.50	50.00

PAEONIA ARBOREA, Tree Peony.

Banski. Large double pink flowers. This variety is a Chinese sort, forming its flowering buds like Dogwood and Hydrangeas at the terminal of the branches. It flowers very early—long before the herbaceous Peonies—and is a splendid acquisition to a flower garden; very free flowering, sure to bloom every year. Strong shrubs on own roots. The youngest are five years old.

Prices are \$3.00, \$4.00, \$5.00 and \$7.50 each.

SALISBURIA ADIANTIFOLIA, GINKGO BILOBA (Maidenhair-tree). This tree is today found only in a wild state in China, and the species is the oldest in cultivation. It has outlived its enemies and is not now attacked by any insect, germ or disease. It is rather slow growing, but very beautiful. The foliage is very lovely and has never been known to drop off during the summer, littering up the lawn. A most excellent tree for permanent avenues, probably not equalled for that purpose, as it has no insect enemies and is not broken down by sleet, ice, snow and other weather conditions.

We are able to furnish both the formal, compact, pyramidal type and the spreading type, if you specify which type you want. The pyramidal type is generally considered the male form; the spreading type, the female. The compact male form carries no fruit.

Size	Each	Ten	Size	Each	Ten
2 to 3 ft.	\$2.00	\$15.00	4 to 5 ft.	\$4.00	\$25.00
3 to 4 ft.	3.00	20.00	5 to 6 ft.	5.00	30.00

SYRINGA, Lilac.

S. vulgaris, Common Purple Lilac. Extra heavy plants.	Size	Each	Ten
	4 to 5 ft.	\$3.00	\$20.00
	5 to 6 ft.	4.00	30.00

S. persica, Persian Lilac. Fragrant lilac flowers. These plants are very bushy, being transplanted spring of 1930.	5 to 6 ft.	4.00	30.00
	6 to 7 ft.	5.00	40.00

S. japonica, Japanese Tree Lilac. Fast growing tree lilac with enormous clusters of pink flowers.	2 to 3 ft.	1.00	9.00
	3 to 4 ft.	1.50	12.50
	4 to 5 ft.	3.50

Public Buildings and Public Parks of the
National Capital

Washington, D. C.

My dear Mr. Wohler:

I have your helpful letter of November 18, 1930, together with enclosed detail list of Japanese Cherry Trees and Flowering Crabs, and I further desire to acknowledge the safe arrival of your shipment of 285 Japanese Cherries and 100 Flowering Crabs for planting in East Potomac and Anacostia Parks.

The larger portion of the consignment of Japanese Cherries has already been planted in East Potomac Park in large color groups of the same variety, where practicable, 20 to 30 feet apart in well drained locations, as you suggested in your last letter. I feel that these trees should make a really very fine showing next spring and I shall be pleased to show them to you upon your next visit to Washington.

In closing may I again express my warm appreciation of your assistance.

Very sincerely yours,

(Signed) F. B. Butler,
Assistant Director.

New York, N. Y.

Dear Sir:

The trees were delivered safely and in excellent condition Saturday. I wish to congratulate you on the character of your stock.

Ground Cover Plants

PACHYSANDRA TERMINALIS, Japanese Spurge.

A beautiful evergreen plant excellent as a ground cover, growing from 6 to 8 inches high. It is perfectly hardy and endures dense shade and dry locations, as well as direct sunlight or moist positions, making an excellent plant for any position requiring other than grass for a ground cover.

It is also suitable as a border for walks and flower beds, as its low green growth at all times may be easily kept within bounds.

Plant 6 to 8 inches apart.

	100	1000
2 yr. Field-grown plants.....	\$10.00	\$60.00
1 yr. Field-grown plants.....	7.00	45.00
Well-rooted plants	5.00	35.00

AJUGA REPTANS, Bugle. Suitable for ground covering in partial shade; also for garden positions and rockeries. Perfectly hardy with rather heavy foliage and blue flowers.

Field-grown plants	6.00	50.00
Divisions	4.00	30.00

AJUGA REPTANS BROCKBANKI. Red foliage, deep blue flowers.

Field-grown plants	10.00	75.00
Divisions	6.00	45.00

VINCA MINOR, Periwinkle or Trailing Myrtle. A trailing, evergreen plant, used extensively for carpeting the ground under shrubs or trees, or on graves. Blue flowers.

Field-grown plants.....	9.00	65.00
Divisions	6.00	35.00

Bethesda, Maryland
Dear Sir:

The Flowering Cherries arrived Saturday and have been planted today.
I want to take this opportunity to thank you very much for your careful attention to our order as well as the beautiful trees sent us.
I am sure they will add great beauty to the place.

Princeton, N. J.
Dear Sir:

The crab apples have arrived and in the rain this evening were planted. Mr. ——— and I both are delighted with them and feel that they are worth much more than we paid.
Westport, Conn.
Dear Sir:

I have just received the Kofugen Cherry which you sent in place of the one that died. It is a fine tree, in good condition and I wish to thank you for your fair and generous treatment and your interest in even a small order. Needless to say, it will give me great pleasure to recommend you to all my friends who are planting trees and shrubs.

10% additional paid at time of purchase insures free replacement for one year.

Condition of Order

The Prices in this Catalog do not cover extra choice specimens selected by customers in the nurseries, nor trees dug with a soil ball. Trees may be dug with a soil ball for local deliveries at an extra cost of from \$1.00 to \$5.00 each, depending on the size.

Our List prices include all packing charges, with the exception of specimen trees and Weeping Cherries over 4 feet high.

We Carry A Complete Line of nursery stock, but catalog only a few specialties. Would be pleased to quote you on any other stock not listed herein.

Terms—Cash with order, except to persons who satisfy us as to their responsibility, when accounts will be due in 10 days. We charge interest at 6% per annum.

Plant Insurance—No guarantee—expressed or implied—is made that stock will grow, as we have no control over after-treatment or weather conditions; the purchaser must assume all risks after stock leaves our Nurseries in good condition. We insure stock for a period of one year for an additional 10% paid at time of purchase. Replacements will be shipped f. o. b. our Nurseries, with packing charges extra.

Claims—To receive consideration it must be made within 10 days after receipt of goods.

Shipping Instructions—Shipping season generally opens about March 1st, but we are not in position to tell when climatic conditions in your locality permit planting. Therefore, kindly instruct us definitely when you want shipment made. Fall shipments may be made after October 1st. Our stock is regularly inspected and certificate will be sent with each shipment.

Write plainly and give explicit directions as to address and mode of shipments. When no shipping directions are given we will use our best judgment and forward by shortest and safest route, usually **express**.

We do not advise B&B (Ball & Burlap), because of the heavier shipping charges due to the increased weight. For any B&B shipments that are necessary we would advise forwarding by **FREIGHT**, unless the factor of time makes **EXPRESS** shipment advisable.

10% additional paid at time of purchase insures free replacement for one year.

PACKING AND SHIPPING. No charge is made for delivery to the freight depots or express offices from which we ship. Packing of heavy and specimen trees such as Flowering Crabs and Cherries at a value of \$15.00 and over, as well as Weeping Cherries at a value of \$10.00 and over, will be charged at a rate of 20% additional to cost. No charge for packing other trees. Freight and express charges are to be paid by the purchaser. Plain and explicit shipping directions should be given with every order, naming mode and route for forwarding, otherwise we will use our own judgment; but upon delivery to railroad, steamboat or express companies our responsibility ceases.

Narberth, Montgomery County, Pa.
